INTELLECTUAL PROPERTY NOTICE

This manual documents the Semantic Vision platform, a proprietary work product of Allen Tyrone Johnson. Third-party technologies (OpenAI, Stripe, MongoDB, React, FastAPI, Resend, Tailwind CSS) are used as infrastructure components and remain the intellectual property of their respective owners. **No IP claim is made over these third-party technologies.**

What IS claimed as original work product: The novel METHOD of combining these technologies; the 60/30/10 vocabulary model; the brand eligibility engine; the brand-in-narrative integration; closed-loop brand analytics; the Agentic Reach Score; the 10-dimension student profile system; the consent architecture; the affiliate referral engine; the onboarding framework; the unified authentication interface; and all UI designs, data models, API architectures, and business logic.

TABLE OF CONTENTS

1. Getting Started

2. Parent/Guardian Guide

3. Student Guide

4. Teacher Guide

5. Brand Partner Guide

6. Administrator Guide

7. Glossary

1. GETTING STARTED

1.1 Unified Login System

Semantic Vision uses a single login page for all user types. Four icons at the top represent different portals:

Icon / Role	Authentication
Heart - Parents	Email + Password
Graduation Cap - Students	Student Code + PIN
Book - Teachers	Email + Password
Megaphone - Brands	Email + Password

Click an icon to switch the login form. Students use a code/PIN (no email required).

1.2 Creating an Account

Click 'Register Here' from the login page. Three account types are available: Parents, Teachers, and Brands. **Student accounts are created BY parents** through the Parent Portal.

If you received a referral code (REF-XXXXXX or AFF-XXXXXX), enter it during parent registration to receive rewards.

1.3 First-Login Onboarding

A guided tutorial wizard appears on first login to each portal (4-5 steps). Click 'Next' to advance, 'Skip' to dismiss. Click the 'Tutorial' button in the portal header to replay it anytime.

2. PARENT/GUARDIAN GUIDE

2.1 Dashboard Tabs

Tab	Purpose
Students	Add and manage student profiles
Subscription	View/upgrade your plan
Marketplace	Browse and assign word banks
Wallet	Manage digital wallet balance
Invite & Earn	Share referral codes for rewards
Offers	View brand partner promotions
Progress	Track children's reading growth
FAQ	Frequently asked questions

2.2 Adding a Student (5-Step Wizard)

Step 1 - Basic Info: Name, age, grade level (Pre-K through Adult). Grade controls vocabulary complexity.

Step 2 - Virtues: Select from 16 character virtues (Courage, Honesty, Kindness, etc.). These are woven into story character behavior.

Step 3 - Strengths & Growth: Describe strengths (celebrated as 'superpowers') and growth areas (modeled through empathetic character development, never shame).

Step 4 - Faith & Culture: Select belief system and cultural context. Stories reflect corresponding values and traditions.

Step 5 - Word Banks: Assign vocabulary word banks with three tiers: Baseline (60%), Target (30%), Stretch (10%).

After creation, you receive a Student Code (e.g., STU-DR40V7) and PIN (e.g., 914027). Keep these safe.

2.3 Subscription & Wallet

Free Plan: Basic story generation. **Premium Plans:** Unlimited stories, advanced analytics, premium features. Top up your wallet via Stripe. Apply coupon codes for discounts.

2.4 Marketplace

Browse word banks (Included, Free, Paid, Specialized). Assign to students. Create your own private word banks with custom baseline/target/stretch words.

2.5 Referral Program

Share your unique referral code. When friends register with your code, you both earn rewards (wallet credits, discounts, or flat fees — configured by admin).

2.6 Offers

View promotional offers from brand partners. Dismiss individual offers or toggle ALL offers off. Offers link to external sites or platform promos.

2.7 Progress Tracking

Per-student metrics: **Vocabulary Mastered** (unique words learned), **Stories Read**, **Agentic Reach Score** (0-100), **Word Banks** assigned, **Target** goal.

2.8 Brand Content Preferences

By default, stories do NOT include brand content. To enable: edit student profile > Advertising Preferences > toggle 'Allow Brand Stories.' You can also block specific categories.

3. STUDENT GUIDE

3.1 Logging In

Click the 'Students' graduation cap icon on the login page. Enter your **Student Code** (STU-XXXXX) and **PIN**. Click 'Enter Academy.'

3.2 Reading Stories

Click 'Create New Story' to generate a personalized 5-chapter story. Highlighted words are your vocabulary targets. After each chapter, answer a comprehension question (4 choices). After all chapters, take a vocabulary quiz — define words and use them in sentences. Score 80%+ to master them.

3.3 Classroom Sessions

Ask your teacher for the 6-digit session code. Enter it to join a live reading session where the teacher controls the pace.

3.4 Progress

Dashboard shows: Vocabulary Mastered count, Stories Read, Agentic Reach Score (0-100). All stories are saved for re-reading.

3.5 FAQ

Click the FAQ button in the header for answers about stories, vocabulary, sessions, and scores.

---

4. TEACHER GUIDE

4.1 Getting Started

Register as a Teacher. Your portal has three tabs: Sessions, Analytics, and FAQ.

4.2 Classroom Sessions

Click 'New Session' to get a 6-digit code. Share with students. You control reading pace and can broadcast questions in real-time via WebSocket.

4.3 Analytics

View per-student vocabulary mastered, stories read, comprehension scores, and class-wide averages.

---

5. BRAND PARTNER GUIDE

5.1 How Brand Integration Works

Your brand is NOT shown as a traditional ad. Instead, when a student requests a story, the AI checks brand eligibility and weaves your products into the narrative as **organic, problem-solving elements**. You then receive analytics on student engagement.

5.2 Eligibility Rules

Your brand appears ONLY when: (1) Campaign is active, (2) Budget remains, (3) Guardian opted in, (4) Categories not blocked, (5) Student age matches targets, (6) Admin-enabled globally.

5.3 Dashboard Tabs

Tab	Purpose
Dashboard	Performance overview
Campaigns	Create/manage campaigns
Budget	Spending and top-up
Story Integrations	See brand in stories, excerpts, questions, student responses
Offers	Create promotions for parents
FAQ	Common brand questions
Analytics	Detailed engagement metrics

5.4 Creating a Campaign

Enter: campaign name, products/descriptions, problem statement, target ages/countries/languages, daily budget, cost-per-impression, logo URL. Leave target ages empty to reach ALL markets.

5.5 Story Integrations (Your Key Analytics)

View: (1) Actual story excerpts mentioning your brand, (2) Brand activation questions and student pass/fail rates, (3) Written student responses, (4) Full story text access. This closed-loop analytics is unique to Semantic Vision.

5.6 Promotional Offers

Create offers pushed to parents: title, description, offer type (internal/external), link. Track views, clicks, and dismissals.

6. ADMINISTRATOR GUIDE

6.1 Dashboard

Platform-wide stats: Total Parents, Teachers, Students, Signups, Word Banks, Stories, AI cost tracking.

6.2 Admin Tabs

Tab	Purpose
Statistics	Platform metrics
Users	Search/manage accounts, edit wallets
Plans	Create subscription plans
Word Banks	Create 3-tier vocabulary banks
Contests	Referral contests with prizes
Brands	Approve/manage brand partners
Affiliates	Manage affiliate program

6.3 Word Bank Creation

Name, category (Included/Free/Paid/Specialized), then add words to 3 tiers: Baseline (60% of story), Target (30%), Stretch (10%). Each word needs: word, definition, example sentence.

6.4 Affiliate Program

Configure: reward type (Flat Fee/Percentage/Wallet Credits), amounts, minimum payout threshold, auto-approve toggle. View all affiliates, approve/deactivate, record payouts.

6.5 Brand Management

Approve new brand applications. View brand revenue, impressions, products. Toggle active/inactive. Create new brand profiles.

6.6 System Controls

LLM model selection, brand sponsorship feature flag (enable/disable platform-wide), default cost per impression, plan management.

7. GLOSSARY

Term	Definition
Agentic Reach Score	0-100 metric: vocabulary mastery relative to reading engagement
Baseline Words	Foundation vocabulary (60%) reinforcing existing knowledge
Target Words	Growth vocabulary (30%) as primary learning objective
Stretch Words	Challenge vocabulary (10%) for aspirational engagement
Brand Activation Question	Comprehension question related to brand product usage in story
Brand Impression	Single instance of brand appearing in a student story
Vision Check	Per-chapter multiple-choice comprehension question
Word Bank	Curated vocabulary collection (baseline/target/stretch tiers)
Student Code	Unique login ID (e.g., STU-DR40V7)
Affiliate Code	Referral code (e.g., AFF-XXXXXX)
Narrative	AI-generated, personalized 5-chapter educational story
Cost Per Impression	Amount debited from brand budget per story inclusion
Consent Gate	Default-false opt-in for brand content
60/30/10 Model	Tiered vocabulary distribution in story generation
